

DEMOLITION

Stanley has elevated demolition tools from crude implements to precision-engineered tools that are every bit as essential and indispensable as a hammer or screwdriver. And while some tool companies make the same basic flat pry bar and curved crowbar, Stanley stands out from the pack with more than two dozen types of demolition tools, including several models that feature original designs.

For general purpose demo work, such as tearing down walls and ceilings, prying off roofs and dismantling kitchen cabinets, Stanley makes two types of tools: demolition and ripping bars, which are intended for ultra-heavy-duty work and have forged hook and claw ends, and spring-steel wrecking bars, which provide great prying strength and resiliency, but at a much lighter weight than traditional ripping bars.

Stanley offers 4 different models of its world-famous WonderBar®, one of the most popular flat bars on the market today. The WonderBar® is extremely useful for almost any prying, nail pulling, wood-splitting or levering job you're likely to encounter.

There are also 5 versions of Stanley's latest creation, the FuBar®, which is arguably one of the most versatile, innovative demo tools on the market today. The FuBar® Functional Utility Bar is a multipurpose tool that can be used for both lightweight and heavy-duty work, including prying, bending, striking, nail pulling, separating and lumber splitting. The one-piece forged steel bar has a unique two-tier jaw for securely locking onto 2-by dimensional lumber.

A specialty tool, called the Board Bender Deck Tool, is designed for straightening joists and decking boards. Stanley makes a line of shorter, thinner Precision Pry Bars that are specifically made for removing decorative wood trim, thin moldings, and window and door casings.

Rounding out Stanley's extensive line of demolition tools is a collection of cold chisels that are perfect for chopping through steel bolts, stone, sheet metal, brick, ceramic tiles, concrete and virtually any other hard, abrasive material.

DEMOLITION TOOLS

FuBar® Forcible Entry Tools

- Forcible entry tool designed by responders for vehicle extrication and extreme demolition
- 8-in-1 tool for prying, splitting, board bending and striking jobs: demolition head, gas shut-off feature, spanner wrench, pry bar for ripping, hydrant wrench, second-tier board jaw (also fits square hydrant nuts), board jaw sized specifically for grabbing common dimensional lumber, beveled nail slot for pulling and prying nails
- One-piece forged steel bar for durability
- Heat-treated and tempered striking face helps prevent chipping
- Heat-resistant grips are durable and lightweight
- Carabiner holes for easy attachment of shoulder strap
- High-visibility 3M™ Scotchlite™ enhances visibility
